## Hướng dẫn đọc ghi file văn bản trong C++ Giáo viên: Nguyễn Hùng Cường

```
#include <iostream>
#include <fstream>
using namespace std;
int main() {
 // Tao va mo file de ghi
 ofstream file("seafood.txt");
 // Ghi du lieu vao file
 file<<"Tieu Vy - Mai Ngoc - Hong Nhung - Mai Bella \n";
 file<<"Khanh Trang - Trieu Thi Ha - Do My Linh - Truong Ngoc Anh \n";
 file<<"Thuy Van - Khanh Van - Hong Diem - Tram Bui\n";
 // Dong file
  file.close();
seafood - Notepad
File Edit Format View Help
Tieu Vy - Mai Ngoc - Hong Nhung - Mai Bella
Khanh Trang - Trieu Thi Ha - Do My Linh - Truong Ngoc
Anh
Thuy Van - Khanh Van - Hong Diem - Tram Bui
                                         Ln 1, Col 1
                                                     100% Windows (CRLF)
                                                                  UTF-8
seafood
